

Amazon Integration

Personalized On-Demand Sending

Send anything on Amazon to your Prospects or Customers

- Product will be shipped directly to our warehouse, repacked with a handwritten note, and sent to prospect or customer.
- You can include items you already have stocked in the warehouse, like custom packaging tape, stickers, swag, and more.
- Orders will turn around and be sent back out within 24 hours of Amazon item delivery to our warehouse.
- The cost of the item + \$15 will be taken from your account balance at time of send to cover the extra shipping and handwritten note. If there is a difference in the \$15, your account balance will be refunded or charged extra.

Buy to Inventory

- If you would like to purchase items from Amazon to store in the warehouse, you can do so by selecting “buy and add to inventory”.
- The items will be delivered to our warehouse, and assigned a location to be stored until you are ready to send them out.
- This can also be done with our project management team. See Sendoso's [Sourcing & Ordering Guide](#).
